

Wallsend Primary Care Network Social Prescribing Service

We are a team of social prescribing link workers based in the following GP practices across Wallsend: Hadrian Health Centre, The Village Green Surgery, Battle Hill Health Centre, and Bewicke Medical Centre.

We work with GPs and nurses to support people with what matters to them, including information about local services such as: access to health information, benefits or housing, managing anxiety, depression, isolation, finding it hard to leave the house, support groups, improving diet and exercise, volunteering, support with accessing drug or alcohol support, mental health services.

You can get in contact with us by asking any of your GP practice staff, including reception and nurses.
