The Good Care Group

Live-in Care by The Good Care Group offers a great alternative to residential care. With a 24-hour live in carer, you will be provided with a professional and personalised service within the comfort of your own home. Staying in safe and familiar surroundings can greatly improve your quality of life, helping you maintain your independence whilst also receiving the support you require. Clients who receive live-in care by The Good Care Group see an improved quality of life and well-being, fewer falls and a reduced decline in function.

In addition to general care and support, we also have specialist services for complex conditions such as Dementia, Parkinson's, MS and Stroke rehabilitation. We provide permanent care placements, and periods of short term respite care following hospital discharge, in an emergency or if your primary family carer needs to take a break or holiday.

We understand that choice, comfort and dignity are essential to happiness; this is why we carefully match our expertly trained carers to each and every client, considering their needs and personality.
